Tagging: Ensure each extinguisher has a unique identification tag or barcode. Location Check: Confirm the extinguisher is in its designated, accessible location. Accessibility: Verify that the extinguisher is unobstructed and easy to reach in an emergency. Visibility: Ensure the extinguisher is clearly visible and not hidden behind objects. Physical Condition Inspection Physical Damage: Look for dents, cracks, or corrosion on the cylinder and nozzle. Hose and Nozzle: Check for cracks, blockages, or damage. Seal and Pin: Confirm the tamper seal and safety pin are intact and properly secured. Mounting Bracket: Ensure the extinguisher is securely mounted and not loose or damaged. Label and Instructions: Verify that labels are legible, intact, and understandable. Pressure and Weight Checks Pressure Gauge: Ensure the needle is in the green zone indicating proper pressure. Weight: Confirm the extinguisher's weight matches the specified weight, indicating no leakage or loss of contents. Maintenance and Serviceability Inspection Tag: Check for the current inspection date and next scheduled inspection. Hydrostatic Testing: Confirm the extinguisher has undergone hydrostatic testing within the required interval (typically every 5-12 years depending on type). Recharge Status: Ensure the extinguisher has been recharged after use or during maintenance. Refill or Replacement: Identify extinguishers that require refilling or replacement. Operational Check Discharge Test: When safe, perform a quick discharge test or check the operational mechanism. Operational Readiness: Confirm that the extinguisher is ready for immediate use.

Developing a Fire Extinguisher Inspection Checklist Template Creating an effective template involves structuring the above components into a user-friendly document that can be used for routine inspections. Here are steps to develop one: Define Inspection Frequency Monthly Inspections: Visual checks for damage and accessibility.
